Forecast for Sunday 13 Aug 2023

Weather: Mostly cloudy overnight and early Monday with a few showers. Brightening up to allow some sunny intervals by mid morning but passing heavy showers are still likely with the chance of lightning. The showers finally dying out during the evening.

Chance of cloud-free hill tops above 700m: 30% at first rising to 90%.

Low cloud and visibility: General cloud above 600-750m overnight and at first in the morning bringing poor visibility, this breaking and lifting to mostly above summits, just the odd summit patch in heaviest of the showers. Visibility away from that cloud, generally good by day but some reductions as showers pass through, briefly poor in any heavier thundery showers.

Meteorologist's View

Cloud amounts and shower details uncertain

Forecast for Monday 14 Aug 2023

Weather: A dry start, any low cloud lifting and breaking to allow some sunshine. Perhaps the odd shower in the afternoon but still much of the time dry, and some areas staying dry.

Maximum wind: Northwest 10-15mph

Chance of cloud-free hill tops above 700m: 90% or more

Low cloud and visibility: Any early morning low cloud below 500m and mist burning off then for the rest of the day cloud broken and above the summits, with good visibility despite any showers.

Temperature: **Valleys:** Plus 10 rising to Plus 20 Celsius
At 700m: Plus 12 Celsius
Freezing level: Above the summits.
